We will also be using the “Count Back Rule” - Count back based first on head-to-head race wins during competition. Where more than two team are tied, the count back for each team shall be the total race wins scored against all the teams that are tied (the combination of wins); if the teams are still tied, then the fastest heat time head-to-head decides the winner.

Willow

23/01/2010 – 25/6/2025

Willow was bought as a companion for Bowie from what we found out was a puppy mill outside of Geelong. They made us pick her up at six weeks of age and she was covered in fleas and dust. She quickly settled into her new home though and even Bowie accepted her a few days later.

She was a fast learner and I thought she'd pick up this flyball thing pretty quickly, it only took Bowie a few weeks to do full runs after all. How wrong could I be? At the park she'd spin around at my feet waiting for me to throw the ball and she carried this into her flyball training, she wouldn't leave me! She went through a flyball seminar at Dandenong held by an overseas expert who confided to me she couldn't help her. Eventually I had someone hold her whilst I box loaded and she finally grasped the concept. I thought great, now I have a good flyballer but in comp after comp she'd grab the ball out of the box and stop and watch the other team running or try to run to them after she'd complete a run. It took nearly 4 years of training up to three times a week to become reliable and she rarely put a paw wrong after that. She turned into a very solid dog and finished her career at 12 years of age with 1450 points.

She settled into retirement well and kept Cobber busy, she was without doubt the boss of the two. Willow loved her long walks even at 15 but struggled getting up and had a few health issues. She's greatly missed.

James.

Blue

16/08/2012 – 26/06/2025

Where do you find the words to describe the dog that has changed your life path? Blue came to us as “my dog” when I was 10. We didn’t realise at the time that his breeder was... questionable at best. This has been a learning curve on how important the early stages of development are for animals. This has given us a lesson, the first of many that Blue’s life granted us. Blue was certainly dog and people reactive in the early days, and his stumpy-tail meant I had to learn from a young age how to read his body language. His confidence improved as I learned what he needed from me and his environment. After Blue’s failed obedience career, I got persuaded to start flyball with him. I started at training the next week and pretty much haven’t left since! Flyball gave him (and me) confidence and skills we would’ve never received in any other community, and I’m very grateful to have a Flyball family around me still. In retirement, Blue taught me about body conditioning, and how the brain and body always work in sync. In his passing, he has reminded me that the compassionate and ethical choices are often the most personally sacrificial. Blue has led me to people that I admire and aspire to. He has led me down paths of growth and knowledge in animal behaviour, communication, training, ethics and morals that have influenced who I am as a person. He has gifted me some patience, some understanding, and my favourite question: what is this behaviour communicating? Thank you to everyone that has impacted our journey - you know who you are. I am forever grateful for my Blue Dog. I have spent a fantastic childhood, adolescence & a bit of adulthood with him by my side, making lifelong memories and enjoying every moment together. It has not and will never be enough time. He is dearly and greatly missed. Mailie.

Flyball Master, Points: 596, Debut: On the Fly 2017, Retired: Dandy Drags 2022, PB: 5.4s.
